Tackle any job with confidence!
Airless Tip Selection

From state-of-the-art features to our color-coded tip handles, we make spray tips easier to use and select. Plus, we provide the technology to give you durable, reliable accessories that delivers a consistent spray pattern for a variety of materials.
- Patented diffuser allows atomization at lower pressures, reducing tip wear and extending tip life
- Pinned handle resists twisting and breakage
- Reversible for easy cleaning
- Liquid-honed for long life and double-tested to ensure accurate spray pattern and flow rate
- Highest-quality carbide tip produces longer useable life
- Color-coded handles for easy identification

ASM’s color-coded tip handle and corresponding tip selection guide make it simple to select the right orifice and fan pattern for your painting application. Follow the steps below for easy tip selection.

Spray Tip Application Guide

1 - Identify the surface you will be spraying
2 - Choose your coating
3 - Determine your spray pattern width
   [spraying 12 in (30.5 cm) from the surface]
4 - Follow chart to tip number

Tip handles are color-coded by orifice (tip hole) size for easy identification on the job site.

Zip-Roll® Pressure Roller

The Zip-Roll pressure roller accessory attaches and is fed paint from your airless pump allowing you to use your system to roll in areas where spraying is not practical. Provides smooth, continuous delivery of paint to all types of surfaces. Just trigger gun to release paint to roller. Pressure rolling is 4 times faster than standard rolling!

- Extends reach — no need for a ladder
- Chrome-plated stainless steel frame provides rust resistance and eliminates streaking
- Hand-Tight system for easy assembly — no tools required
